Attorney Docket No. IN-0012-2

For: *Capillary Printing Systems*

This application claims priority to USSN
09/150,502, filed September 9, 1998.

TRANSMITTAL

The Commissioner for Patents
Washington D.C. 20231

Dear Commissioner,

This is a divisional application of pending Serial No. 09/150,502, filed September 9, 1998 and having the same title and inventors. The specification is identical to that of the priority application except that three minor amendments made to the priority Specification on Aug 10, 2000 have been incorporated, as have a new set of claims. This specification contains no new matter.

The pending claims relate to an open capillary printing system for printing on a substrate, wherein the system includes a motion resistor operatively joined to the capillary and providing an incomplete resistance to motion of the capillary along its longitudinal axis, biasing said motion toward the substrate, wherein the system prints by decelerating the capillary to move the agent through the bore, out the tip and onto the substrate; see, e.g. original claim 3 of the priority application.

The Examiner is invited to call the undersigned if she would like to amend the claims to clarify the foregoing or seeks further clarification of the claim language.

Respectfully submitted,
SCIENCE & TECHNOLOGY LAW GROUP
